Welcome to STEVENSWOOD® — Where Innovation Meets Craftsmanship

At STEVENSWOOD®, our core mission is encapsulated in our motto: ***changing the world of surfaces***. As a premier supplier of high-quality engineered surfaces, we are dedicated to providing architects and designers with products that not only meet but exceed their expectations in aesthetics, durability, and realism.

Our Commitment:

STEVENSWOOD® is proud to be a 100% employee-owned company, with every product meticulously crafted in the USA. Our state-of-the-art manufacturing facilities in Teutopolis and Effingham, Illinois, are where our commitment to quality and innovation comes to life.

Seamless Availability:

To streamline your design process, all of our colors are available as edge-banded samples at no cost through our website. Our full-size stocked TFL panels, along with matching Edge Banding and High-Pressure Laminate (HPL), are ready to ship within three business days, ensuring your project stays on schedule without any delays.

Comprehensive Product Range:

Beyond TFL and HPL, STEVENSWOOD® collaborates with several trusted suppliers to offer complementary products, including 3DL, Finish Foil, Polyester Wrap (with 100% match), and bespoke door programs, creating a cohesive solution for any design requirement.

For more details or to discuss your next project, please contact us at stevenswood@stevensind.com. Discover why STEVENSWOOD® is the choice for designers who demand the best in both function and form.

MADE IN THE USA

HOW TO SPECIFY STEVENSWOOD®

Curious how panels from our production line become beautiful doors, shelving, cabinets, desks, or even the interior of a hotel room?

It's easy to bring STEVENSWOOD® into your project!

Just follow these simple steps:

1. Choose Your Color:

Browse the options inside this brochure and select the perfect color for your design.

2. Order a Free Sample:

Visit our website at stevens-wood.com to request a complimentary sample and see the finish in person.

3. Add Us to Your Specifications:

Use the simple guide provided below to include STEVENSWOOD in your specification documents effortlessly.

CODE & NAME	SUBSTRATE	DIMENSIONS
WC4 STRAIGHT NOCE	TFL PARTICLEBOARD	4x8 3/4"
784 KARIUS WALNUT	TFL MDF	5x8 3/4"
SPI UMBRA	VANISH PARTICLEBOARD	4x8 1/4"

4. Contact a Sales Representative:

Reach out to one of our Sales Reps to confirm pricing and product availability, ensuring your project stays on time and on budget.

For a more comprehensive Specification Guide and Technical Data Sheets, please visit our Downloads page stevens-wood.com/downloads

Integrate STEVENSWOOD® into your next project for high-quality, beautifully crafted surfaces that elevate any space!

PRODUCTS

1 EDGE BANDING

Edge banding is a crucial component for panel products, providing both functional and aesthetic benefits.

Seamlessly Finished Edges: Edge banding provides a clean, seamless appearance to the edges of panel products, concealing raw edges and enhancing the overall aesthetics.

Durability and Protection: It acts as a protective barrier, safeguarding against moisture, impact, and wear and tear, extending the lifespan of your panel products.

2 HIGH PRESSURE LAMINATE (HPL)

High-Pressure Laminate (HPL) is a versatile and durable surfacing material used in a wide range of high traffic applications, from countertops to cabinets and wall panels.

Exceptional Durability: HPL is engineered to withstand the rigors of daily life. It features a high-pressure manufacturing process that combines multiple layers of kraft paper saturated with phenolic resins, finished with a protective melamine top layer. This results in a surface that's resistant to scratches, impact, heat, and moisture.

THERMALLY FUSED LAMINATE (TFL)

3 Particleboard

4 MDF

Thermally Fused Laminate (TFL) is a high-quality surfacing material that offers a perfect blend of aesthetics, durability, and sustainability for a wide range of applications.

Durability Beyond Compare: TFL is renowned for its robust construction. Its core is made from high-quality particleboard or MDF, which is then thermally fused with a decorative layer and finished with a protective topcoat. This results in a surface that can withstand everyday wear and tear, including scratches, impact, and moisture.

Sustainable Choice: TFL is an environmentally friendly choice. It's made from recycled and sustainable materials, and its production process minimizes waste. It's also low-VOC (Volatile Organic Compounds), contributing to better indoor air quality.

Versatile Applications: TFL is suitable for a wide range of applications, including residential and commercial furniture, cabinetry, wall paneling, countertops, and more. Its adaptability is limited only by your creativity.

Cost-Effective Solution: TFL provides an affordable alternative to natural wood and stone while delivering comparable aesthetics and performance.

Hygienic and Easy to Clean: TFL is non-porous, making it highly resistant to stains and bacteria. Cleaning and maintenance are hassle-free, making it an ideal choice for spaces that require hygiene and cleanliness, such as kitchens and healthcare facilities.

5 PLYWOOD

Plywood cores are renowned for their exceptional strength and stability.

Enhanced Durability: Composed of multiple layers of wood veneers bonded together, these cores resist warping, cracking, and bending under stress, ensuring your surfaces remain robust and durable for years to come.

Superior Load-Bearing Capacity: Ideal for heavy-duty applications, plywood offers superior load-bearing capabilities. Its cross-grained structure distributes weight evenly, making it an excellent choice for high-traffic areas and furniture that demands high structural integrity.

TEXTURES

WOODGRAINS

LINEAR [Artika] L

A deep straight grain texture that enhances the depth and realism of woodgrain designs, adding a sophisticated and authentic touch to any surface.

MATTE WOOD MW

A lightly textured woodgrain that closely mimics a matte veneer finish. This texture is designed to provide an authentic wood appearance with a subtle, natural feel.

EIR EIR

Our Embossed in Register (EIR) textures offer the most realistic wood patterns, with texture-matched grains that replicate the feel and look of real wood.

FINE GRAIN FG

Our latest texture, featuring a fine grain with a soft, detailed finish, offers a subtle yet refined appearance that enhances the natural beauty of wood surfaces.

W WARM

A smooth, refined finish ideal for both solid colors and material surfaces, providing a clean matte look.

AF ANTI-FINGERPRINT

The ultra-matte, anti-fingerprint surface delivers our smoothest, most refined finish, ensuring a pristine, flawless appearance with minimal maintenance.

HG HIGH GLOSS

A high-gloss finish that brings a sleek, chic touch to any design, elevating surfaces with a modern, luxurious shine.

S SOFTEX

A timeless, universal texture with exceptional wear resistance, perfect for high-traffic areas. This classic pattern combines durability and versatility, making it a staple in the industry.

DURA-LAM

Laminating TFL to plywood provides huge savings when compared to HPL on plywood and gives the A&D community the product they need to stay on budget! Laminate Dura-Lam to particleboard and you have a panel with a higher impact rating than High Pressure Laminate! Be confident in choosing Dura-Lam. The cost savings and durability are unmatched.

HIGH PERFORMANCE, HIGH IMPACT TFL

The first ever high-performance resin system combined with state-of-the-art lamination provides a TFL that can be laminated to the following: Plywood, Particle Board, MDF.
