WHY STEVENSWOOD®

Design-Driven Collections

Over 100 curated designs across woodgrains, solids, textures, and specialty finishes aligned with current and emerging interior trends.

Coordinated Surfaces

All woodgrain TFLs feature matching edge banding and coordinating HPL, ensuring seamless visual continuity across panels, edges, and surfaces.

Engineered Substrate Options

Available on particleboard from stock, with MDF or plywood cores made to order, allowing designers to specify performance without altering surface aesthetics.

Integrated Product System

Complementary offerings in finish foils, 3DL, TruMatch components, and TFL doors allow one surface story across the entire interior.

Sustainability at Every Level

Stevenswood products utilize 100% recycled and recovered wood fibers, supporting healthier interiors and responsible material sourcing.

48-Hour Stock Program

Core stocked designs ship within 48 hours, supporting fast-moving projects and confident specification.

HOW TO SPECIFY STEVENSWOOD®

Curious how panels from our production line become beautiful doors, shelving, cabinets, desks, or even the interior of a hotel room?

It's easy to bring STEVENSWOOD® into your project!

Just follow these simple steps:

1. Choose Your Color:

Browse the options inside this brochure and select the perfect color for your design.

2. Order a Free Sample:

Visit our website at stevens-wood.com to request a complimentary sample and see the finish in person.

3. Add Us to Your Specifications:

Use the simple guide provided below to include STEVENSWOOD in your specification documents effortlessly.

CODE & NAME	SUBSTRATE	DIMENSIONS
WC4 STRAIGHT NOCE	TFL PARTICLEBOARD	4x8 3/4"
784 KARIUS WALNUT	TFL MDF	5x8 3/4"

4. Contact a Sales Representative:

Reach out to one of our Sales Reps to confirm pricing and product availability, ensuring your project stays on time and on budget.

For a more comprehensive Specification Guide and Technical Data Sheets, please visit our Downloads page stevens-wood.com/downloads

Integrate STEVENSWOOD® into your next project for high-quality, beautifully crafted surfaces that elevate any space!

PRODUCTS

1 EDGE BANDING

Edge banding is a crucial component for panel products, providing both functional and aesthetic benefits.

Seamlessly Finished Edges: Edge banding provides a clean, seamless appearance to the edges of panel products, concealing raw edges and enhancing the overall aesthetics.

Durability and Protection: It acts as a protective barrier, safeguarding against moisture, impact, and wear and tear, extending the lifespan of your panel products.

2 HIGH PRESSURE LAMINATE (HPL)

High-Pressure Laminate (HPL) is a versatile and durable surfacing material used in a wide range of high traffic applications, from countertops to cabinets and wall panels.

Exceptional Durability: HPL is engineered to withstand the rigors of daily life. It features a high-pressure manufacturing process that combines multiple layers of kraft paper saturated with phenolic resins, finished with a protective melamine top layer. This results in a surface that's resistant to scratches, impact, heat, and moisture.

THERMALLY FUSED LAMINATE (TFL)

3 Particleboard

4 MDF

Thermally Fused Laminate (TFL) is a high-quality surfacing material that offers a perfect blend of aesthetics, durability, and sustainability for a wide range of applications.

Durability Beyond Compare: TFL is renowned for its robust construction. Its core is made from high-quality particleboard or MDF, which is then thermally fused with a decorative layer and finished with a protective topcoat. This results in a surface that can withstand everyday wear and tear, including scratches, impact, and moisture.

Sustainable Choice: TFL is an environmentally friendly choice. It's made from recycled and sustainable materials, and its production process minimizes waste. It's also low-VOC (Volatile Organic Compounds), contributing to better indoor air quality.

Versatile Applications: TFL is suitable for a wide range of applications, including residential and commercial furniture, cabinetry, wall paneling, countertops, and more. Its adaptability is limited only by your creativity.

Cost-Effective Solution: TFL provides an affordable alternative to natural wood and stone while delivering comparable aesthetics and performance.

Hygienic and Easy to Clean: TFL is non-porous, making it highly resistant to stains and bacteria. Cleaning and maintenance are hassle-free, making it an ideal choice for spaces that require hygiene and cleanliness, such as kitchens and healthcare facilities.

5 PLYWOOD

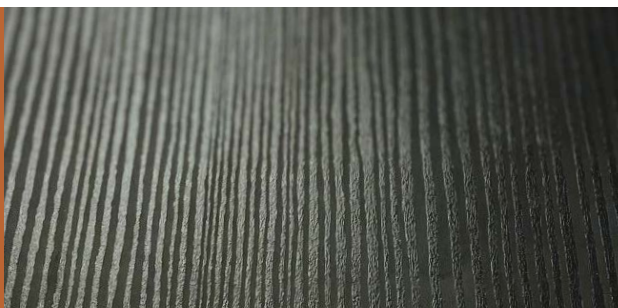

Plywood cores are renowned for their exceptional strength and stability.

Enhanced Durability: Composed of multiple layers of wood veneers bonded together, these cores resist warping, cracking, and bending under stress, ensuring your surfaces remain robust and durable for years to come.

Superior Load-Bearing Capacity: Ideal for heavy-duty applications, plywood offers superior load-bearing capabilities. Its cross-grained structure distributes weight evenly, making it an excellent choice for high-traffic areas and furniture that demands high structural integrity.

TEXTURES

WOODGRAINS

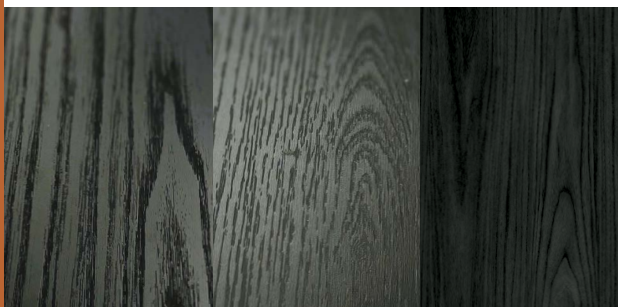

LINEAR [Artika] L

A deep straight grain texture that enhances the depth and realism of woodgrain designs, adding a sophisticated and authentic touch to any surface.

MATTE WOOD MW

A lightly textured woodgrain that closely mimics a matte veneer finish. This texture is designed to provide an authentic wood appearance with a subtle, natural feel.

EIR EIR

Our Embossed in Register (EIR) textures offer the most realistic wood patterns, with texture-matched grains that replicate the feel and look of real wood – Tokaj Alder, Trio, and Meridosha.

NATURAL GRAIN NG

Our latest texture, featuring a natural grain with a soft, detailed finish, offers a subtle yet refined appearance that enhances the natural beauty of wood surfaces.

W WARM

A smooth, refined finish ideal for both solid colors and material surfaces, providing a clean matte look.

AF ANTI-FINGERPRINT

The ultra-matte, anti-fingerprint surface delivers our smoothest, most refined finish, ensuring a pristine, flawless appearance with minimal maintenance.

HG HIGH GLOSS

A high-gloss finish that brings a sleek, chic touch to any design, elevating surfaces with a modern, luxurious shine.

S SOFTEX

A timeless, universal texture with exceptional wear resistance, perfect for high-traffic areas. This classic pattern combines durability and versatility, making it a staple in the industry.

REFLECTIVE
SURFACE

Finish Foil is a decorative, printed paper surface commonly used for drawer boxes, cabinet interiors, closet systems, shelving, and a wide range of furniture components. It provides a consistent, durable, and cost-effective finish while allowing designers and manufacturers to match the look of their exterior materials.

STEVENSWOOD® offers its own stocked Finish Foil line featuring three core colors.

519 Kingston Maple

043 Stipple White

705 Midnight Black

In addition to these stocked options, all STEVENSWOOD® designs are available as custom-order Finish Foils, ensuring perfect visual alignment across any project or application.

SUSTAINABILITY

Designed For Sustainable Specification

At **STEVENSWOOD®**, sustainability is built into every surface we produce. Our Thermally Fused Laminate (TFL) products are engineered to support healthier interiors, responsible material use, and long-term performance, making them a smart choice for today's design and specification community.

TFL is inherently a **low-VOC surface solution**, helping to improve indoor air quality in residential, commercial, and institutional environments. Produced by thermally fusing decorative papers to engineered wood panels using heat and pressure (rather than solvent-based adhesives) TFL contributes to reduced emissions while delivering consistent, durable performance.

Beyond indoor air quality benefits, TFL is a **resource-efficient alternative** to many traditional surface materials. It optimizes the use of responsibly sourced and recovered wood fibers, minimizes waste, and offers exceptional durability, supporting longer product life cycles and reduced environmental impact.

STEVENSWOOD® is also proud to participate in sustainability initiatives such as **Climate Positive Now**, powered by **Materials Intelligence**, reinforcing our commitment to transparency, data-driven decision making, and continuous improvement.

By combining low-VOC performance, responsible sourcing, and verified sustainability initiatives, STEVENSWOOD® TFL surfaces give architects and designers confidence to specify materials that align with both design intent and environmental responsibility.

STEVENSWOOD®

Where Innovation Meets Craftsmanship

MADE IN THE USA at STEVENSWOOD®, our core mission is encapsulated in our motto: changing the world of surfaces. As a premier supplier of high-quality engineered surfaces, we are dedicated to providing architects and designers with products that not only meet but exceed their expectations in aesthetics, durability, and realism.

WHO WE ARE

Employee-Owned & Made in the USA

100% employee-owned, with all products manufactured in our facilities in Illinois, where craftsmanship meets advanced surface technology.

Design & Performance Driven

Developed for architects and designers seeking surfaces that balance realism, durability, and contemporary design direction.

Seamless Availability

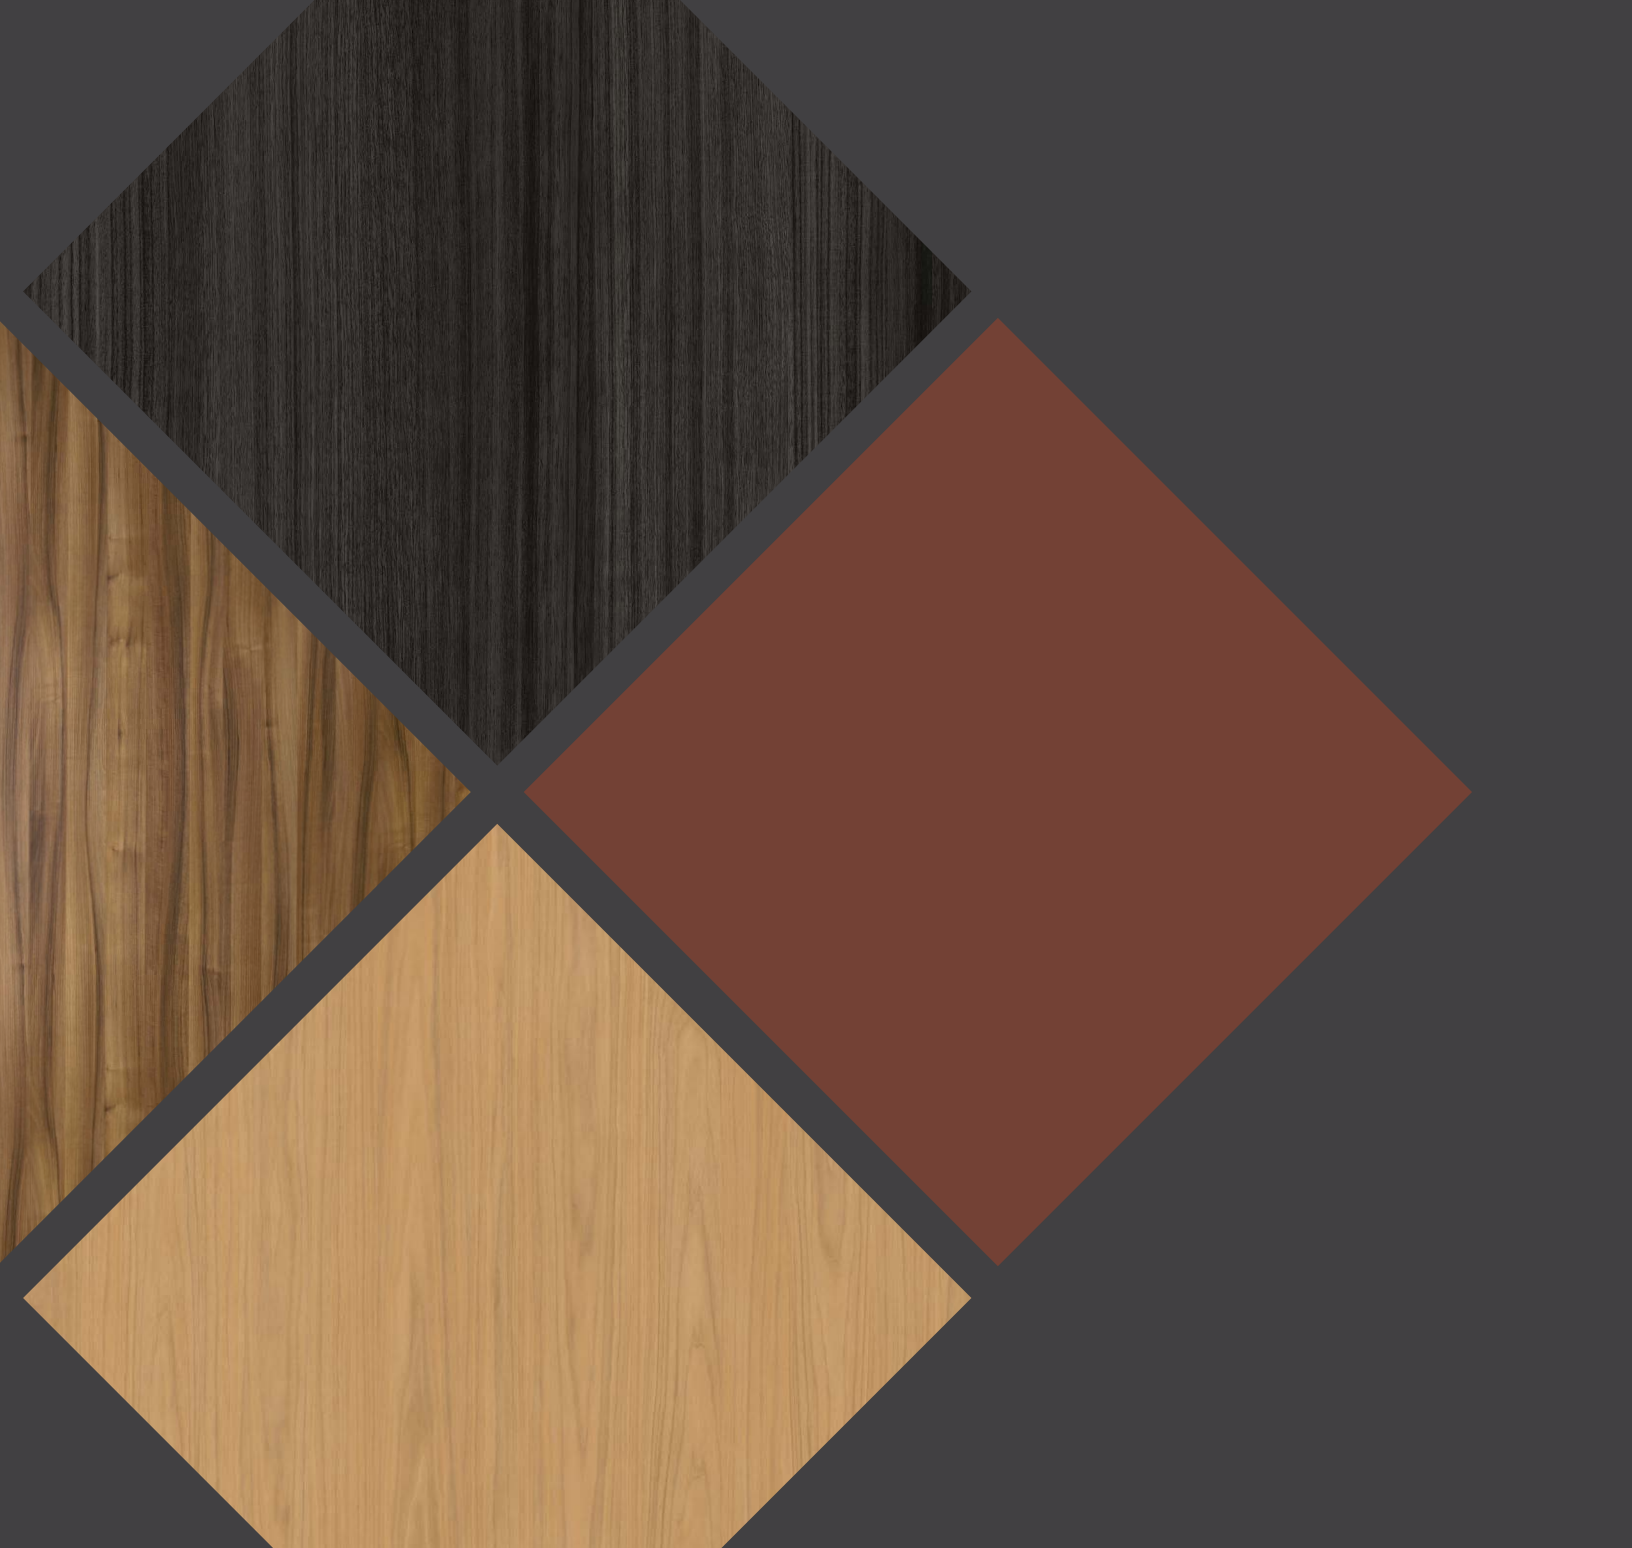

Edge-banded samples available at no cost on our website, with stocked TFL panels, matching edge banding, and HPL ready to ship in 48 hours.

Comprehensive Surface Solutions

Beyond TFL and HPL, Stevenswood offers coordinated partnerships of 3DL, finish foils, TruMatch, and bespoke door programs, ensuring a cohesive solution for any design requirement.

704 WEST MAIN, TEUTOPOLIS, IL 62467 | (217) 857-7100
